Adoption of the revised forms for the registration of Vital Statistics.

With reference to the observations and suggestions made by Mr. E.R.Sundararajan in his report on the present ~~statistics~~ status of Birth Death and Epidemic Diseases report in some selected areas in the State, Government suggested the consideration of simpler forms of Births and Death Registers and simple cards for reporting epidemic diseases.

2. The Director accordingly submitted the marginally noted revised forms with his letters of 31st March 1931 and 9th April - 1931. The Deputy Commissioners of Districts were thereupon consulted about the suitability of the forms.

1.Monthly Birth Report
2.Monthly Death Report
3.3 cards to Report Epidemic diseases.

3. The Deputy Commissioners of Hassan, Mysore and Tumkur are agreeable to the adoption of the new forms suggested. The Deputy Commissioner of Shimoga thinks that while the proposed forms are an improvement over the old ones, it may be difficult for the illiterate persons to correctly fill them. The Deputy Commissioner, Kadur, is also agreeable if certain columns are omitted. The remaining Deputy Commissioners ~~were~~ are agreeable to the adoption of the forms subject to certain modifications as detailed below:-

(a) The Deputy Commissioner, Bangalore District

(i) In the Death Reports, the name of the informant should be given.

(ii) The names of the Diseases may be printed as a foot-note or on the reverse of the forms as a misplacement of the entry in the form as suggested may cause unnecessary alarm.

(iii) In the consolidated form a column may be opened to show the date to which the report relates.

(b) The Deputy Commissioner, Chitaldrug.

(i) The headings in the several forms may be bi-lingual as at present. The birth and death forms as suggested by the Director of Health have bi-lingual headings but kannada headings could not be included in the copies sent to the Deputy Commissioners)

(ii) A column may be added under "nigmenga)

(iii) A note containing full instructions may be inserted below the cover.

(c) The Deputy Commissioner Kolar agrees with the Deputy Commissioner Bangalore in (a) (ii). He also doubts why all the three diseases should be entered in the abstract epidemic card while coloured cards are proposed to be utilised. (But the Director has not proposed coloured cards as surmised by the Deputy Commissioner). The Deputy Commissioner Kolar has also made some further suggestions in the daily epidemic cards e.g. filling up of the address of the Taluk Officer so that the Patel need do nothing but enter the name of the person or persons attacked or dead. He further suggests that the card system may be tried in the first instance in the Bangalore and Mysore cities and Kolar Gold Fields where trained staff for registration and checking are available.

11.4.32

Serial No.

Retransmitted with compliments.

Having carefully studied the un-official file relating to the consideration of the revised forms of the monthly registers of births and deaths and simple cards for the reporting of epidemic diseases, for the use of patels in rural areas, I have the honour to submit the following for early favourable consideration of Government.

The Deputy Commissioners of Districts are in agreement with the view that there will be distinct improvement in the registration of Vital Statistics by the introduction of the new forms suggested. Whereas the Deputy Commissioners of Mysore, Hassan and Tumkur Districts approve the proposals in toto the minor points raised by some of the remaining Deputy Commissioners may be summarised as follows with suitable answers against each of them.

Minor points raised by Deputy Commissioners	Answers.
1. It may be difficult for illiterate persons to fill the forms correctly.	The Policy of the Government is to have literate patels as far as possible. However a patel who can fill up the old forms can easily fill in the new ones.
2. The name of the informant should be given in the Death Report.	This is not necessary since the patel has to assume responsibility for each report he makes. The village is small and the patel knows all about it.
3. The names of diseases may be printed as a ₹ footnote or on the reverse of the forms	The patel can at best estimate the diagnosis of a few diseases only and these are given prominence in the form suggested.

GENERAL SECRETARY 6 JAN. No.

Note—Contn. Sheet.

WD 50—GBPM—60,000—13-8-31.

General and Revenue Secretariat | File No. Sani 75 of 1930

Serial No.		
	3. as misplacement of the entry in the form as suggested may cause unnecessary alarm.	The register being a monthly statement does not cause any alarm whilst the epidemic card gives all the alarm needed. The reverse of the form is reserved for initials and remarks of inspecting officers.
	4. The headings of the several forms may be bi-lingual.	They are bi-lingual in English and canarese.
	5. A column may be added under "Influenza"	This is such a difficult disease for diagnosis that the patel should not be forced to guess too much, at any rate for the present.
	6. "Order of Birth" may be explained in a footnote on the birth return.	The object of the return will be vitiated by giving lengthy and dubious instructions. The column is quite self-explanatory, particularly the canarese heading.
	7. Instructions printed in Kannada may be inserted below the cover in each register	As soon as the Government Order is issued, simple instructions will be printed on the outer page of the cover of each register both in English and canarese.
	8. Omit column for, "Order of Birth", "No. of living children" and "No. of years of marriage" and "Conjugal condition" at death (Shimoga.)	This information is of great importance and must on no account be deleted.
	9. Classification as to age in the epidemic card is unnecessary (Shimoga)	Without the indication of age the statistics are practically valueless.
	10. The epidemic card should have previously printed addresses etc. (Kolar)	An examination of the draft card will show that provision has been made for printing the addresses on the reverse of the card.
	11. Introduction of ~~closed~~ Coloured cards, one for plague, one for cholera, and one for small-pox, may be of value. (Kolar)	Multiplication of cards would be ineffective and cost also is against this.

As regards paragraph 4 of my letter No. V.S. 598 dated April 9, 1931, regarding the amending of the Bye-Laws in force, I may state that, as no penal clause is thought of at present, but only the amending of the existing forms under the existing regulation, no

No. V.S. 573
Enc: 2

Office of the Director of Health
with the Government of Mysore,

"Grace Ville," Palace Road,

Bangalore, dated, March 25, 1931.
31.

From

Secy 75-30-1

J. V. Karve, Esq., M.B., Ch.B., D.P.H.,
Director of Health with the Government of
His Highness the Maharaja of Mysore,
B a n g a l o r e.

SECRETARY'S OFFICE 31 MAR 1931

GENERAL BR. 31 MAR 1931

9 m 6226

To

N. Madhava Rao, Esq., B.A., B.L.,
Chief Secretary to the Government of
His Highness the Maharaja of Mysore,
B a n g a l o r e.

Sir,

With reference to your No. G. 7874-81 P & S 63-30-2 dated 26th January 1931 and in continuation of this office No. C.604 - dated 12th February 1931, I have the honour to submit herewith revised forms of the Patels' Birth and Death Registers for approval of Government. The registers are to last for 5 years and will contain 120 sheets each. Every month the Patel will copy the details of births or deaths, as the case may be, written up on the first sheet, on to the second sheet and submit the latter to the Taluk Office. To facilitate the tearing perforation will be made in every second sheet at the binding space.

Old forms are also herewith submitted for easy reference.

The registers should be made of yellow, fairly thick paper, having a decent binding. They should be distributed to the Patels through the Amildars and Revenue Inspectors on a particular day and the old registers (in whatever stage of use they may be) should be simultaneously captured and stored up in the Taluk Office.

I request that Government will pass early orders in th matter.

I have the honour to be,
Sir,
Your most obedient servant,

Director of Health.

Chief Secretary to the Government
of Mysore, Bangalore.

OH... SECRETARY.
9 APR. 1931

Sir,

9 m 628

In continuation of my letter No. V.S.573 dated the 25/31st March 1931, regarding the alteration of the present forms for the registration of Vital Statistics, I have the honour to submit herewith for perusal and approval of Government, specimen cards in English and Kanarese for the Notification of Plague, Cholera and Small pox.

2) The old forms now in use are also forwarded for ready reference.

For want of convenience and also because of the necessity to write out detailed account in the forms, regular and timely reports are not being made at present. This is obvious if it is stated that 50% of Plague deaths and only 30% of Smallpox deaths are reported.

3) With a view to facilitate the reporting the following cards are suggested for use by the Patel, the Amildar and the Medical Subordinate. Card o.1 (in kanarese) is in triplicate and the Patel after entering the very few

details required retains one of the cards as his permanent record and, of the other two, he sends one to the Amildar and the other to the District Health (Sanitary) Officer. These officers will write out card No.2 every day for reporting to higher officers and to the medical subordinates concerned according to the accompanying scheme. The medical subordinate will visit the affected area on receipt of information and report his findings on card No.3 to the Director of Health, through the District Health (Sanitary) Officer.

4) Before introducing the card system the existing Bye-laws for the reporting of Epidemics will have to be amended to admit of change of form for reporting.

5) I request that Government will be pleased to accord early approval to the proposal.

I have the honour to be,
Sir,
Your most obedient servant,

Director of Health.

SIR,

Subject:—

With reference to your letter No. G. 11762-9 Sany. 75-30-3 dated 18.5.31 calling for my opinion re the revised forms proposed to be introduced for the registration of vital statistics in the State, I have the honour to state as follows:-

In the form of death report, name of the informant may be added. It is also unnecessary to print separate columns for various diseases. Only a list of such diseases may be given in a foot-note or printed on the reverse of the form as at present. Otherwise any misplacement of entry in the columns of plague and cholera will cause unnecessary alarm and trouble in respect of the cause of death. The form otherwise is an improvement over the existing one. The main heading "Cause of death" has been omitted; this may be re-introduced.

The revised form for consolidated reports contains provision only for date of report. But as the report of the Amildar will not be on the date of occurrence a column may be opened, as in the forms in use at present showing the date for which report is made.

With these alterations the forms are acceptable.

I have the Honour to be,

Sir,

Your most obedient servant,

K V Anantaraman

Deputy Commissioner,
Bangalore District.

Subject: Revision of forms for the registration of Vital Statistics.

Sir,

Adverting to your letter No. G. 11762-9/Sany. dated the 18th May 1931 asking for opinion on the above subject, I have the honour to state that the changes suggested are suitable and may be adopted.

I think, however, that the headings in the several forms may be bilingual as at present, that a column may be added under the head "Influenza" in the Death return and that the term "Order of Births" will have to be explained in Kannada as a foot-note of the Birth return. A page containing the instructions printed in Kannada may be inserted below the cover in each book. Among other things, the instructions now in force, viz., that the Patels should be required to take the signature of the writer in case of illiterate Patels, to preserve the books securely, to produce them readily, if required, by the Inspecting Officers, to hand the registers over in tact to their successors in case of change of incumbents and to return the registers to the Taluk Office when the books are completely written up and fresh ones are required and any other instructions that may be found necessary for correctly filling up the returns may be incorporated.

With these additions and alterations, the revised forms may be adopted.

I have the honour to be,
S i r
Your most obedient servant,

M Seshadri
Deputy Commissioner.

SIR,

With referenceto your letter No.11762-7/Sany.75-30-3 dated the 18th May 1931, calling for my opinion about the introduction of certain forms for the registration of vital statistics in the State, I have the honor to state as follows:-

In the Form " Monthly Birth Report" the last 3 columns viz. (i) Order of Birth - (ii) No. of living children etc., - (iii) No, of years after the marriage of mother - may beomitted.

2. In the monthly Death Report the column " conjugal condition" may be omitted.

3. In the Notification of Epidemic diseases the elaborate classifi-cation according to age is unnecessary.

4. The other two statements viz. Detailed report and the Daily report of epidemic diseases may be adopted.

I am of opinion that with the abovemodifications the forms received with your letter read above may be introduced.

I have the honor to be,
Sir,
Your most obedient servant,

Deputy Commissioner,
Kadur District.

R. RANGA RAO, ESQ., B.A., B.L.,
General Secretary to Government of Mysore,
Bangalore.

SIR,

In reply to the Chief Secretary's No:G.11762-9/San.75-30-3 dated 18th May 1931 in the matter of the forms proposed to be introduced for the registration of Vital Statistics and the reporting of Epidemic diseases in the State, I have the honor to state as follows:-

1. As regards the forms referred to in the Director's No:V. S.573 dated 25th/31st March 1931, re: births and deaths registers, I have to state that the forms for birth report may be approved. As regards the form of death report I do not think it necessary to provide several independent columns for the cause of death. Instead of it, the column maybe styled ~~the~~ cause of death and in the foot note, an explanation may be given saying "under cause of death ~~"~~ enter Plague, Small-pox &c., ~~"~~ giving all the details now shown as independent columns. It is a general rule in statistics that the primary collector or enumerator of data should be required only to give the facts and that classification or tabulation should not be entrusted to him. All ~~verification~~ abstraction and tabulation from the primary data must be done by the trained agency ~~and entered~~ working in under efficient supervision.

2. As regards the forms sent with the Director's letter No:V S.598 dated 9th April 1931 regarding the report of epidemic diseases I agree with the Director that it is necessary to supply coloured cards printed in Kannada for all patels, in triplicate, so that they may have merely to post the cards entering date whenever an epidemic occ
to the inclusion in these cards, of
cation of attacks and deaths which he proposes, I do

32

not also understand why he enters in the same form all the three diseases when according to his letter he proposes separate cards for each disease. In my opinion the patels should be required merely to post the card of the respective colour to the Amildar and the District Health Officer on the very day of the occurrence entering therein the date and the name of person attacked or dead. Even the name of the village and the name of Taluk or District in the address portion of the cards meant for the Amildar and the Health Officer respectively should be filled up and the frontings entered in the Taluk office before delivery of the cards to the respective patels, so that even if the patel forgets to write anything and merely posts the card ~~after franking~~, the taluk office and the District Health Officer will know which village is affected with which disease. The classified information asked for in ~~detailed~~ the daily report need not be required ~~every day~~ from the patel but may be incorporated in the report to be sent by the Medical subordinate. Once there has been an outbreak the further daily reports to be sent by the patel should merely contain the names of persons ~~only~~ attacked or dead each day until the outbreak ceases, and nothing more.

3. If the Government considers that all the forms as proposed by the Director should be given a trial, it is best to try them in the Cities of Bangalore, Mysore and the Kolar Gold Fields proper as there are full time Health Officers in charge and a number of Sanitary Inspectors who can be expected to verify details and supply information accurately.

I have the honor to be,
S i r,
Your most obedient servant,

Deputy Commissioner,
Kolar District.

Order No. G 5876-87/Eccls 5

Dated, Bangalore, 11-2-33

In his "Report on the present status of Birth, Death and Epidemic Disease reports" Mr. S.M. Sundararajan has explained in detail the several defects in the existing system of registration of Vital Statistics and the reporting of epidemics in the State and made certain suggestions for their improvement with a view to provide a suitable basis for effective public health administration and formulation the formation of necessary relief measures where such relief was called for. The Director was thereupon requested to examine the recommendations made in the above repor and submit definite proposals for the orde of Govt. He has accordingly forwarded a set of revised forms of Patels' Birth and

and Death Registers and also three specimen cards for the notification of Plague, cholera and small pox. It is stated -- that card No.1 (in Kannada) will be in triplicate and the Patel, after entering the very few details required has to retain one of the cards as his permanent records and of the other two, he has to send one to the Amildar and the other to the District Health (or Sanitary) officer. These officers will write out card No.2 every day for reporting to higher officers and to the medical subordinates concerned. The medical subordinates will visit the affected area on receipt of information about epidemics and report his findings on card No.3, to the Director of Health through the District Health (or Sanitary) officer.

2. The Deputy Commissioners, who were consulted about the suitability of the several forms referred to above, -- generally agree that their adoption is likely to result in an improved registration of Vital occurrences.

3. The forms of revised registers and specimen cards are approved and appended to this order. The Superintendent, Government Printing, is requested to arrange to print, in consultation with the Director of Health, the requisite number of the registers and the cards and supply the same to the Deputy Commissioners of Districts. The Deputy Commissioners will, after withdrawing the present regis-

registers in whatever stage they may be and arranging for their custody in the taluk offices, distribute the registers and cards to the several subordinate officers in -- accordance with the instructions to be -- issued by the Director of Health.

4. The Director of Health is requested to take necessary steps for the introduction of the new registers and the cards throughout the State from a date to be fixed by him.

ORDER NO. G. 5676-87—P. H. 75-30-12, DATED BANGALORE, THE 11TH FEBRUARY 1933.

In his "Report on the present status of Birth, Death and Epidemic Disease Reports" Mr. E. R. Sundararajan has explained in detail the several defects in the existing system of registration of Vital Statistics and the reporting of epidemics in the State and made certain suggestions for their improvement with a view to provide a suitable basis for effective Public Health Administration and the formulation of necessary relief measures where such relief was called for. The Director was thereupon requested to examine the recommendations made in the above report and submit definite proposals for the orders of Government. He has accordingly forwarded a set of revised forms of Patel's Birth and Death registers and also three specimen cards for the notification of Plague, Cholera and Small-pox. It is stated that card No. 1 (in Kannada) will be in triplicate and the Patel, after entering the very few details required, has to retain one of the cards as his permanent record and of the other two, he has to send one to the Amildar and the other to the District Health (or Sanitary) Officer. These Officers will write out card No. 2 every day for reporting to higher officers and to the medical subordinate concerned. The medical subordinate will visit the affected area on receipt of information about epidemics and report his findings on card No. 3, to the Director of Health through the District Health (or Sanitary) Officer.

2. The Deputy Commissioners, who were consulted about the suitability of the several forms referred to above, generally agree that their adoption is likely to result in an improved registration of vital occurrences.

3. The forms of revised registers and specimen cards are approved and appended to this order. The Superintendent, Government Printing, is requested to arrange to print, in consultation with the Director of Health, the requisite number of the registers and the cards and supply the same to the Deputy Commissioners of Districts. The Deputy Commissioners will, after withdrawing the present registers in whatever stage they may be and arranging for their custody in the taluk offices, distribute the registers and cards to the several subordinate officers in accordance with the instructions to be issued by the Director of Health.

40

NO. G. 5676-87—P. H. 75-30-12, DATED 11TH FEBRUARY 1933.

4. The Director of Health is requested to take necessary steps for the introduction of the new registers and the cards throughout the State from a date to be fixed by him.

R. RANGA RAO,
Secretary to Government,
General Department.

To—The Director of Health in Mysore.
The Revenue Commissioner in Mysore.
The Deputy Commissioners of Districts
The Superintendent, Government Printing, with the forms and cards.
The Comptroller to Government.
